### Skills

#### HTML

HTML5, JSX, EJS

#### CSS

CSS3, SASS (SCSS)

#### Javascript

React, Express, Typescript, Node.js

#### Testing

Jest, Vitest

#### Bundlers

Webpack, Vite

#### Databases

PostgreSQL

#### Linux

#### Git

#### Front-end

development

#### Back-end

development

### Projects

**Memory game,** *TypeScript · React.js · SASS · Responsive Web Design · JavaScript eXtension (JSX)* [🔗](#)

**Source code** [🔗](#) Created a game that shuffles a collection of cards and challenges user not to click the same card twice. Implemented card flip animation and sound.

#### Shopping cart,

*TypeScript · React.js · SASS · Vitest · Responsive Web Design · JavaScript eXtension (JSX)* [🔗](#)

**Source code** [🔗](#) Created frontend for an imaginary shop which fetches available products from an external API with sorting capabilities and lets user put some into the cart. Wrote tests with vitest and react testing library to check for edge cases and increase code maintainability.

**Weather app,** *Webpack · HTML5 · Cascading Style Sheets (CSS) · JavaScript · Responsive Web Design* [🔗](#)

**Source code** [🔗](#) Wrote an app that takes any city name available in the world and displays its weather forecast. Added additional features such as name completion and fetching related weather gifs.

**CV generator app,** *JavaScript · React.js · SASS · Responsive Web Design · JavaScript eXtension (JSX)* [🔗](#)

**Source code** [🔗](#) Created a basic app taking as input user info and allowing to preview and download a generated cv in the pdf format.

#### Message board app,

*TypeScript · Express.js · SASS · Embedded JavaScript (EJS) · PostgreSQL · Responsive Web Design* [🔗](#)

**Source code** [🔗](#) Wrote an app that stores messages in the remote PostgreSQL database.
